## MEMORANDUM

**TO:** Members of the Technical Advisory Committee

**FROM:** Damon Fortney, Planner I  
Genesee County Metropolitan Planning Commission

**DATE:** June 12, 2015

**SUBJECT:** **City of Fenton National Functional Classification (NFC) Proposal**

The City of Fenton is proposing to reconnect Caroline Street through the downtown area between Leroy Street and Walnut Street. Proposed new roads must have a National Functional Classification (NFC) that reflects an expected function in order to be eligible for federal transportation funding. A request must be made to the Michigan Department of Transportation (MDOT) and Federal Highway Administration (FHWA) to designate a proposed road.

Existing segments of Caroline Street to the west of Leroy Street, and east of Walnut Street are currently classified as Major Collectors. Therefore, designating the future connection between Leroy and Walnut Streets as a Major Collector would allow for a continuous federal-aid route. The length of the proposed route is 0.05 miles and will not significantly impact the total federal-aid road mileage within Genesee County.

At this time, staff is requesting that the Technical Advisory Committee provide a recommendation of support to the Metropolitan Alliance for the proposed NFC changes. Following approval, the proposed changes will be sent on for approval by MDOT and FHWA.
