Performance Measures and TIP Projects

A key feature of the Fixing America’s Surface Transportation (FAST) Act is the establishment of a performance and outcome-based program, originally introduced through the Moving Ahead for Progress in the 21st Century (MAP-21) Act. The objective of a performance-based program is for states and MPOs to invest resources in projects that collectively will make progress toward the achievement of national goals. 23 CFR 490 outlines the seven areas in which performance goals are required. These seven areas include: Safety; Infrastructure Condition; Congestion Reduction; System Reliability; Freight Movement; Environmental Sustainability, and Reduced Project Delivery Delay. Keep in mind that projects should be able to address performance measures which will help Genesee County meet its targets. A list of performance measures and targets is included at the end of this application.

PERFORMANCE PRINCIPLES (18 Points Available)

1. COMPLETE STREETS (3 Points Available)

Which of the complete streets design elements are planned as part of this project? (ie: bike lanes, sidewalks, ADA accessible crosswalks, pedestrian crossings, etc.) If none, please explain. Does your project increase the safety of the street?

2. SAFETY - (5 Points Available)

Points will be given to projects that implement safety improvements in conjunction with normal roadway improvements. Safety improvements such as 4-to-3 lane conversions, signage and/or signal upgrades, lane re-striping, access management, turn lane additions, etc. all qualify. Please describe below the safety improvements proposed for this project.

3. AREA-WIDE IMPACT - (10 Points Available)

Agency judgement shall be taken into consideration in this category. There are certain important and significant criteria which do not fit into any of the above categories. Nevertheless these should be included in establishing priorities. This criteria includes the following:

- a. Is this project located in an Environmental Justice (EJ) Zone identified in the Genesee County 2040 Long Range Transportation Plan? If so, what are the effects of the project, both positive and negative, and how do you plan to mitigate the negative effects?
(2 Points)

- b. Please identify and explain any additional transportation-related improvements taking place in the area. (2 Points)

- c. Is this project located in a traditional downtown area? Please explain the importance of this project to the community's traditional downtown. (4 Points)

- d. Regarding system reliability and congestion mitigation, points are available for projects that improve traffic flow and freight movement. Write a narrative that describes how your project can improve: travel time; congestion; freight movement; traffic signals; intersection accidents; and corridor timing. (2 Points)
