FY 2020-2023 TIP Performance Measure Related Projects

Below is a listing of the total amount of money programmed in the original approved FY 2020-2023 TIP that will make progress towards the performance measure categories listed below.

Project Category	Amount Programmed	Impact on Condition
Safety / Non-Motorized	\$24,275,316	Reduce potential for motor vehicle crashes and non-motorized crashes, injuries and fatalities
Pavement Preservation	\$114,312,344	Improve surface condition and IRI, eliminate issues with cracking, rutting and faulting
Transit	\$67,793,767	Reduce percentage of vehicles, equipment and facilities that are past useful life benchmark
Bridges	\$54,339,135	Reduce number of structurally deficient and functionally obsolete bridges
System Performance / Congestion	\$13,311,673	Improve freight movement, reduce traffic congestion and associated user delay costs

The following table shows the average amount spent in a typical year for each performance measure category according to historical spending data outlined in the 2040 Long Range Transportation Plan. It should be noted that the funding in these categories can rise and fall in any given year due to large capital projects being implemented at the state or local level and varying levels of grants and discretionary funds awarded. For example, local agencies apply for funds for bridge, transit, safety, system performance and non-motorized programs which are competitive on a statewide level. These annual grant awards will be added to the funding amounts in the categories above.

Category	Average Annual Spending
Safety / Non-Motorized	\$3,119,695
Pavement Preservation	\$17,741,484
Transit	\$15,974,448
Bridges	\$15,561,451
System Performance / Congestion	\$2,061,038
